

complete surface protection

www.rmx-global.com

**a water-based, non-hazardous spray
consisting of a blend of reactive
polymers used to impart a protective
invisible coating to surfaces.**

paint protection

U.V. blocking

fully hydrophobic

protects against chemical
contaminants

slows dirt build up

extend the cleaning cycle

slows the build up of dirt

prevents particles from
penetrating the paint

also protects
glass/composites/bare metals

enhances and protects
corporate colours

low maintenance

quick and easy application
process

single application only

lasts 3 years

no aftercare required

not removed by glycols or other
de-icing chemicals

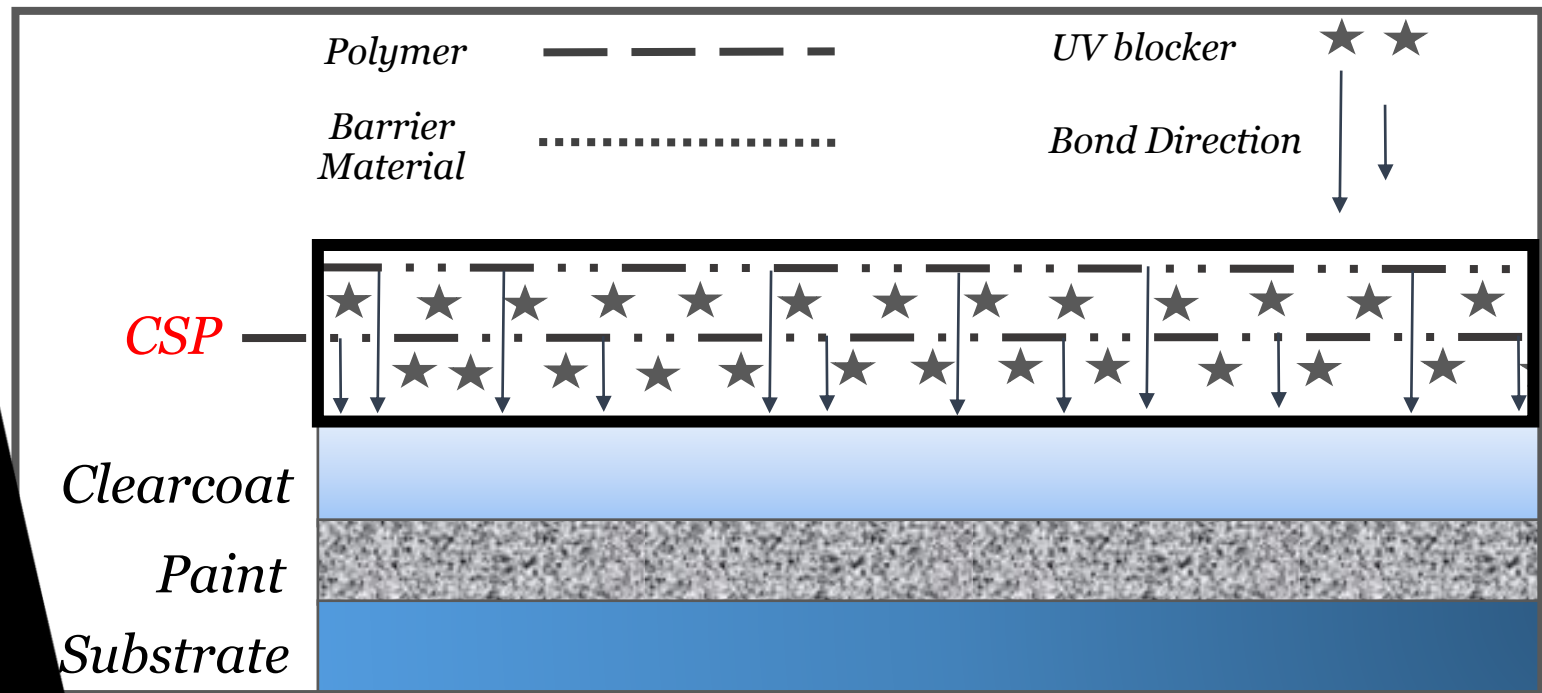

The technology

microscopic, invisible surface

smoother finish with lower drag

ultra lightweight only adding
2 – 4 kg per aircraft

wide operating window from
-80 to 560 degrees Celsius

tested approved

Boeing
Airbus

D6-17487 Revision T
AIMS09-00-002 (issue 3, July 2011)
